

## PARAMYXOVIRUS OUTBREAK

Dear Members,

As you are all aware the DPI were expected to send out a situation report yesterday (20<sup>th</sup> Oct) but it was not forthcoming.

I contacted the DPI to find out why this had not happened and it was explained to me that the reason was due to there NOT being any further reported outbreaks since 10<sup>th</sup> October (As per DPI report dated 18/10).

The DPI informed me that they will send a further report next week or earlier if there is a deterioration of the position.

Stephen Kearsey
