

Dear Members,

Thanks for the feedback I have received in regards my last email.

I wish for it to be known that the NSW DPI have confirmed to me today that they do support the importation of the Paramyxo Vaccine into Australia and the importation is also supported by the Commonwealth Chief Veterinary Officer.

I have also been informed by the NSW DPI that the Merck application has been lodged with the APVMA and is being processed at the moment. This is great news and hopefully this will facilitate an early as possible release of the vaccine.

Regards

Stephen Kearsey
